

**{mapview} for quick maps**

**{mapview} for quick  
maps**

# **{mapview} is built for quick dataviz**

With {ggplot2} we can build print quality static maps.

With {leaflet} we can build rich, interactive maps.

With {mapview} we can check if our data makes sense.

# (RStudio Coding Slide)

# mapview features

- Designed to be fast
- Works with most common geospatial data formats
  - {sp}
  - {sf}
  - {raster}
  - {stars}
- Can be further customised, see package website for more details:  
[r-spatial.github.io/mapview](https://r-spatial.github.io/mapview)
